

Understanding Challenging Behavior of Individuals with Autism

A Free Workshop Presented by Autism Learning Partners in Collaboration with the Autism Society of Texas

This workshop is designed for families who have children with Autism Spectrum Disorder (ASD) or other related disorders who would like further insight into responding to challenging behavior.

The presentation will aim to support families to better understand the thinking patterns, social perspectives, and socio-emotional qualities of children with ASD. The presentation will emphasize individual rights, freedom of expression, and how that expression is different for individuals diagnosed with ASD.

The presentation will address how the science of Applied Behavior Analysis (ABA) allows us to objectively assess, understand, and use a positive behavior approach when responding to challenging behavior.

Saturday, August 17th

10:30 AM – 12:00 PM

Austin Public Library

Windsor Park Branch

5833 Westminster Dr.

Austin, TX 78723

Join Associate Clinical Director, **Nina Carmichael, MA, BCBA, LBA**, for a discussion about assessing and treating challenging behavior for individuals with autism. We'll talk about best practices and discuss available treatment options.
